# Style

## Create

Create a simple style.

```
geo-shell> style create --params "stroke=black stroke-width=0.25 fill=wheat" --file
examples/style_create.sld
```

| Name   | Description          | Mandatory | Specified Default | Unspecified Default |
|--------|----------------------|-----------|-------------------|---------------------|
| params | The style parameters | true      |                   |                     |
| file   | The output file      | true      |                   |                     |

```
geo-shell> style create --params "stroke=black stroke-width=0.25 fill=wheat" --file
examples/style_create.sld
```

Style stroke=black stroke-width=0.25 fill=wheat written to /home/travis/build/jericks/geo-shell/examples/style\_create.sld!

```
geo-shell> workspace open --name naturalearth --params src/test/resources/naturalearth.gpkg
Workspace naturalearth opened!
```

```
geo-shell> layer open --workspace naturalearth --layer countries --name countries
Opened Workspace naturalearth Layer countries as countries
```

```
geo-shell> layer style set --name countries --style examples/style_create.sld
Style /home/travis/build/jericks/geo-shell/examples/style_create.sld set on countries
```

```
geo-shell> layer open --workspace naturalearth --layer ocean --name ocean
Opened Workspace naturalearth Layer ocean as ocean
```

```
geo-shell> layer style set --name ocean --style examples/ocean.sld
Style /home/travis/build/jericks/geo-shell/examples/ocean.sld set on ocean
```

```
geo-shell> map open --name map
Map map opened!
```

```
geo-shell> map add layer --name map --layer ocean
Added ocean layer to map map
```

```
geo-shell> map add layer --name map --layer countries
Added countries layer to map map
```

```
geo-shell> map draw --name map --file examples/style_create.png
Done drawing /home/travis/build/jericks/geo-shell/examples/style_create.png!
```

```
geo-shell> map close --name map
Map map closed!
```

```

  </sld:UserLayer>
</sld:StyledLayerDescriptor>

```

## Vector Default

Create a default vector style.

```
geo-shell> style vector default --layer countries --color #F5F5DC --file
examples/countries_default.sld
```

| Name    | Description     | Mandatory | Specified Default | Unspecified Default |
|---------|-----------------|-----------|-------------------|---------------------|
| layer   | The Layer       | true      |                   |                     |
| color   | The color       | false     | #f2f2f2           | #f2f2f2             |
| opacity | The opacity     | false     | 1.0               | 1.0                 |
| file    | The output file | true      |                   |                     |

```
geo-shell> workspace open --name naturalearth --params src/test/resources/naturalearth.gpkg
Workspace naturalearth opened!
```

```
geo-shell> layer open --workspace naturalearth --layer countries --name countries
Opened Workspace naturalearth Layer countries as countries
```

```
geo-shell> style vector default --layer countries --color #F5F5DC --file
examples/countries_default.sld
Default Vector Style for countries written to /home/travis/build/jericks/geo-
shell/examples/countries_default.sld!
```

```
geo-shell> layer style set --name countries --style examples/countries_default.sld
Style /home/travis/build/jericks/geo-shell/examples/countries_default.sld set on countries
```

geo-shell> **layer open** --workspace naturalearth --layer ocean --name ocean

Opened Workspace naturalearth Layer ocean as ocean

geo-shell> **style vector default** --layer ocean --color DeepSkyBlue --file examples/ocean\_default.sld

Default Vector Style for ocean written to /home/travis/build/jericks/geo-shell/examples/ocean\_default.sld!

geo-shell> **layer style set** --name ocean --style examples/ocean\_default.sld

Style /home/travis/build/jericks/geo-shell/examples/ocean\_default.sld set on ocean

geo-shell> **map open** --name map

Map map opened!

geo-shell> **map add layer** --name map --layer ocean

Added ocean layer to map map

geo-shell> **map add layer** --name map --layer countries

Added countries layer to map map

geo-shell> **map draw** --name map --file examples/style\_vector\_default.png

Done drawing /home/travis/build/jericks/geo-shell/examples/style\_vector\_default.png!

geo-shell> **map close** --name map

Map map closed!

Country Style

```

        </sld:Rule>
      </sld:FeatureTypeStyle>
    </sld:UserStyle>
  </sld:UserLayer>
</sld:StyledLayerDescriptor>

```

## Vector Gradient

Create a gradient vector style.

```
geo-shell> style vector gradient --layer countries --field PEOPLE --colors greens --number 8
--method quantile --file examples/style_vector_gradient.sld
```

| Name     | Description   | Mandatory | Specified Default | Unspecified Default |
|----------|---|-----------|-------------------|---------------------|
| layer    | The Layer   | true      |                   |                     |
| field    | The field   | true      |                   |                     |
| number   | The number of categories                              | true      |                   |                     |
| colors   | The colors  | true      |                   |                     |
| method   | The classification method (Quantile or EqualInterval) | false     | Quantile          | Quantile            |
| elsemode | The else mode (ignore, min, max)                      | false     | ignore            | ignore              |
| file     | The output file                                       | true      |                   |                     |

```
geo-shell> workspace open --name naturalearth --params src/test/resources/naturalearth.gpkg
Workspace naturalearth opened!
```

```
geo-shell> layer open --workspace naturalearth --layer countries --name countries
Opened Workspace naturalearth Layer countries as countries
```

geo-shell> **style vector gradient** --layer countries --field PEOPLE --colors greens --number 8  
--method quantile --file examples/style\_vector\_gradient.sld  
Gradient Vector Style for countries's PEOPLE Field written to /home/travis/build/jericks/geo-shell/examples/style\_vector\_gradient.sld!

geo-shell> **layer style set** --name countries --style examples/style\_vector\_gradient.sld  
Style /home/travis/build/jericks/geo-shell/examples/style\_vector\_gradient.sld set on countries

geo-shell> **layer open** --workspace naturalearth --layer ocean --name ocean  
Opened Workspace naturalearth Layer ocean as ocean

geo-shell> **layer style set** --name ocean --style examples/ocean.sld  
Style /home/travis/build/jericks/geo-shell/examples/ocean.sld set on ocean

geo-shell> **map open** --name map  
Map map opened!

geo-shell> **map add layer** --name map --layer ocean  
Added ocean layer to map map

geo-shell> **map add layer** --name map --layer countries  
Added countries layer to map map

geo-shell> **map draw** --name map --file examples/style\_vector\_gradient.png  
Done drawing /home/travis/build/jericks/geo-shell/examples/style\_vector\_gradient.png!

geo-shell> **map close** --name map  
Map map closed!

## Vector Unique Values From Text File

Create a unique values vector style from a text file

geo-shell>    **style**    **vector**    **uniquevaluesfromtext**    --field    UnitSymbol    --textFile

```
src/test/resources/mars/I1802ABC_geo_units_RGBlut.txt --geometryType polygon --styleFile
examples/style_vector_uniquevaluesfromtext.sld
```

| Name         | Description                    | Mandatory | Specified Default | Unspecified Default |
|--------------|--------------------------------|-----------|-------------------|---------------------|
| field        | The field name                 | true      |                   |                     |
| geometryType | The geometry type              | true      |                   |                     |
| textFile     | The input text file            | true      |                   |                     |
| styleFile    | The output sld or<br>ysld file | true      |                   |                     |

```
geo-shell> workspace open --name mars --params src/test/resources/mars
Workspace mars opened!
```

```
geo-shell> layer open --workspace mars --layer geo_units_oc_dd --name mars
Opened Workspace mars Layer geo_units_oc_dd as mars
```

```
geo-shell> style vector uniquevaluesfromtext --field UnitSymbol --textFile
src/test/resources/mars/I1802ABC_geo_units_RGBlut.txt --geometryType polygon --styleFile
examples/style_vector_uniquevaluesfromtext.sld
Create a unique values style from /home/travis/build/jericks/geo-
shell/src/test/resources/mars/I1802ABC_geo_units_RGBlut.txt for UnitSymbol and polygon to
/home/travis/build/jericks/geo-shell/examples/style_vector_uniquevaluesfromtext.sld
```

```
geo-shell> layer style set --name mars --style examples/style_vector_uniquevaluesfromtext.sld
Style /home/travis/build/jericks/geo-shell/examples/style_vector_uniquevaluesfromtext.sld set on
mars
```

```
geo-shell> map open --name map
Map map opened!
```

```
geo-shell> map add layer --name map --layer mars
Added mars layer to map map
```

```
geo-shell> map draw --name map --file examples/style_vector_uniquevaluesfromtext.png
Done drawing /home/travis/build/jericks/geo-
shell/examples/style_vector_uniquevaluesfromtext.png!
```

```
geo-shell> map close --name map
Map map closed!
```

```

## Raster Default

Create a default raster style.

```
geo-shell> style raster default --raster pc --opacity 0.75 --file examples/style_raster_default.sld
```

| Name    | Description     | Mandatory | Specified Default | Unspecified Default |
|---------|-----------------|-----------|-------------------|---------------------|
| raster  | The Raster      | true      |                   |                     |
| opacity | The opacity     | false     | 1.0               | 1.0                 |
| file    | The output file | true      |                   |                     |

```
geo-shell> format open --name pierce_county --input src/test/resources/pc.tif
Format pierce_county opened!
```

```
geo-shell> raster open --format pierce_county --raster pc --name pc
Opened Format pierce_county Raster pc as pc
```

```
geo-shell> style raster default --raster pc --opacity 0.75 --file examples/style_raster_default.sld
Default Raster Style for pc written to /home/travis/build/jericks/geo-shell/examples/style_raster_default.sld!
```

```
geo-shell> raster style set --name pc --style examples/style_raster_default.sld
Style /home/travis/build/jericks/geo-shell/examples/style_raster_default.sld set on pc
```

```
geo-shell> map open --name map
Map map opened!
```

geo-shell> **map add raster** --name map --raster pc

Added pc layer to map map

geo-shell> **map draw** --name map --file examples/style\_raster\_default.png

Done drawing /home/travis/build/jericks/geo-shell/examples/style\_raster\_default.png!

geo-shell> **map close** --name map

Map map closed!

```

```

## Raster Color Map

Create a color map raster style.

```
geo-shell> style raster colormap --raster pc --values
"25=#9fd182,470=#3e7f3c,920=#133912,1370=#08306b,1820=#fffff5"
--file
examples/style_raster_colormap.sld
```

| Name     | Description                                    | Mandatory | Specified Default | Unspecified Default |
|----------|--|-----------|-------------------|---------------------|
| raster   | The Raster                                     | true      |                   |                     |
| opacity  | The opacity                                    | false     | 1.0               | 1.0                 |
| values   | The comma delimited list of values (key=value) | true      |                   |                     |
| type     | The type (intervals, values, ramp)             | false     | ramp              | ramp                |
| extended | Whether to use extended colors or not          | false     | false             | false               |
| file     | The output file                                | true      |                   |                     |

```
geo-shell> format open --name pierce_county --input src/test/resources/pc.tif
Format pierce_county opened!
```

```
geo-shell> raster open --format pierce_county --raster pc --name pc
```

Opened Format pierce\_county Raster pc as pc

```
geo-shell> style raster colormap --raster pc --values  
"25=#9fd182,470=#3e7f3c,920=#133912,1370=#08306b,1820=#fffff5"  
--file  
examples/style_raster_colormap.sld  
Colormap Raster Style for pc written to /home/travis/build/jericks/geo-  
shell/examples/style_raster_colormap.sld!
```

```
geo-shell> raster style set --name pc --style examples/style_raster_colormap.sld  
Style /home/travis/build/jericks/geo-shell/examples/style_raster_colormap.sld set on pc
```

```
geo-shell> map open --name map  
Map map opened!
```

```
geo-shell> map add raster --name map --raster pc  
Added pc layer to map map
```

```
geo-shell> map draw --name map --file examples/style_raster_colormap.png  
Done drawing /home/travis/build/jericks/geo-shell/examples/style_raster_colormap.png!
```

```
geo-shell> map close --name map  
Map map closed!
```

```
