#### Raster

#### **Open**

Open a Raster.

geo-shell> raster open --format earth --raster earth --name earth

Name	Description	Mandatory	Specified Default	Unspecified Default
format	The Format name	true		
raster	The Raster name	true		
name	The name	false		

geo-shell> **format open** --name earth --input src/test/resources/earth.tif Format earth opened!

geo-shell> **raster open** --format earth --raster earth --name earth Opened Format earth Raster earth as earth

geo-shell> **raster close** --name earth Raster earth closed!

geo-shell> **format close** --name earth Format earth closed!

#### Close

Close a Raster.

geo-shell> raster close --name earth

Name	Description	Mandatory	Specified Default	Unspecified Default
name	The Raster name	true		

geo-shell> **format open** --name earth --input src/test/resources/earth.tif Format earth opened!

geo-shell> **raster open** --format earth --raster earth --name earth Opened Format earth Raster earth as earth

geo-shell> **raster close** --name earth Raster earth closed!

geo-shell> **format close** --name earth Format earth closed!

#### List

List open Rasters.

geo-shell> raster list

No parameters

geo-shell> **format open** --name earth --input src/test/resources/earth.tif Format earth opened!

geo-shell> **raster open** --format earth --raster earth --name earth Opened Format earth Raster earth as earth

geo-shell> raster list
earth = GeoTIFF

geo-shell> **raster close** --name earth Raster earth closed!

geo-shell> **format close** --name earth Format earth closed!

#### Info

Get information about a Raster.

geo-shell> **raster info** --name earth

Name	Description	Mandatory	Specified Default	Unspecified Default
name	The Raster name	true		

geo-shell> **format open** --name earth --input src/test/resources/earth.tif Format earth opened!

geo-shell> **raster open** --format earth --raster earth --name earth Opened Format earth Raster earth as earth

geo-shell> raster info --name earth

Format: GeoTIFF Size: 800, 400

Projection ID: EPSG:4326

Projection WKT: GEOGCS["WGS 84", DATUM["World Geodetic System 1984",

SPHEROID["WGS 84", 6378137.0, 298.257223563, AUTHORITY["EPSG","7030"]],

AUTHORITY["EPSG","6326"]],

PRIMEM["Greenwich", 0.0, AUTHORITY["EPSG","8901"]],

UNIT["degree", 0.017453292519943295],

AXIS["Geodetic longitude", EAST], AXIS["Geodetic latitude", NORTH],

AUTHORITY["EPSG","4326"]]

Extent: -179.999999999997, -89.9999999998205, 179.9999999996405, 90.0

Pixel Size: 0.4499999999995505, 0.44999999999551

Block Size: 800, 8

Bands: RED\_BAND

Min Value: 56.0 Max Value: 255.0

GREEN\_BAND

Min Value: 84.0 Max Value: 255.0

BLUE\_BAND

Min Value: 91.0 Max Value: 255.0

geo-shell> raster close --name earth

Raster earth closed!

geo-shell> format close --name earth

Format earth closed!

#### **Value**

Get a value from the Raster.

geo-shell> raster value --name earth --x 60 --y 45

geo-shell> raster value --name earth --x 10 --y 15 --type pixel

Name	Description	Mandatory	Specified Default	Unspecified Default
name	The Raster name	true		
band	The x coordinate	false	0	0
X	The x coordinate	true		
у	The y coordinate	true		
type	The y coordinate	false	geometry	geometry

geo-shell> **format open** --name earth --input src/test/resources/earth.tif Format earth opened!

geo-shell> **raster open** --format earth --raster earth --name earth Opened Format earth Raster earth as earth

geo-shell> **raster value** --name earth --x 60 --y 45 235.0

geo-shell> **raster value** --name earth --x 10 --y 15 --type pixel 109.0

geo-shell> **raster close** --name earth Raster earth closed!

geo-shell> **format close** --name earth Format earth closed!

### **Envelope**

Create a Vector Layer from the envelope of a Raster.

geo-shell> raster envelope --name earth --output-workspace layers --output-name outline

Name	Description	Mandatory	Specified Default	Unspecified Default
name	The Raster name	true		
output-workspace	The output Layer Workspace	true		
output-name	The output Layer name	true		

geo-shell> **format open** --name earth --input src/test/resources/earth.tif Format earth opened!

geo-shell> **raster open** --format earth --raster earth --name earth Opened Format earth Raster earth as earth

geo-shell> **workspace open** --name layers --params memory Workspace layers opened!

geo-shell> **raster envelope** --name earth --output-workspace layers --output-name outline Done creating envelope in outline from earth!

geo-shell> **style create** --params "stroke=black stroke-width=3" --file examples/outline.sld Style stroke=black stroke-width=3 written to /home/travis/build/jericks/geo-shell/examples/outline.sld!

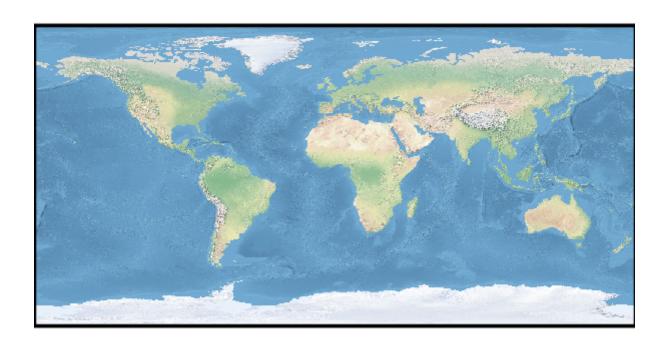

geo-shell> **layer style set** --name outline --style examples/outline.sld Style /home/travis/build/jericks/geo-shell/examples/outline.sld set on outline

geo-shell> **map open** --name map Map map opened!

geo-shell> **map add raster** --name map --raster earth Added earth layer to map map

geo-shell> **map add layer** --name map --layer outline Added outline layer to map map

geo-shell> **map draw** --name map --file examples/raster\_envelope.png
Done drawing /home/travis/build/jericks/geo-shell/examples/raster\_envelope.png!

### **Get Style**

Get the Raster's style.

geo-shell> raster style get --name pc --style examples/pc\_style.sld

Name	Description	Mandatory	Specified Default	Unspecified Default
name	The Raster name	true		
style	The SLD File	false		

geo-shell> **format open** --name pierce\_county --input src/test/resources/pc.tif Format pierce\_county opened!

geo-shell> **raster open** --format pierce\_county --raster pc --name pc Opened Format pierce\_county Raster pc as pc

geo-shell> style colormap --values raster --raster рс "25=#9fd182,470=#3e7f3c,920=#133912,1370=#08306b,1820=#fffff5" --file examples/style\_raster\_colormap.sld Colormap Raster Style /home/travis/build/jericks/geofor written to рс shell/examples/style\_raster\_colormap.sld!

geo-shell> **raster style set** --name pc --style examples/style\_raster\_colormap.sld Style /home/travis/build/jericks/geo-shell/examples/style\_raster\_colormap.sld set on pc

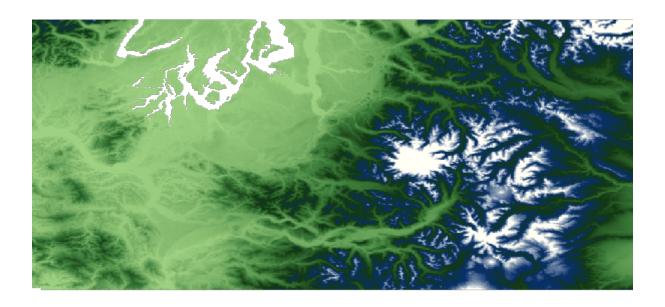

geo-shell> **map open** --name map Map map opened!

geo-shell> **map add raster** --name map --raster pc Added pc layer to map map

geo-shell> **map draw** --name map --file examples/raster\_style\_get.png
Done drawing /home/travis/build/jericks/geo-shell/examples/raster\_style\_get.png!

geo-shell> **map close** --name map Map map closed!

geo-shell> **raster style get** --name pc --style examples/pc\_style.sld pc style written to /home/travis/build/jericks/geo-shell/examples/pc\_style.sld

## **Set Style**

Set a Raster's style

geo-shell> raster style set --name pc --style examples/style\_raster\_colormap.sld

Name	Description	Mandatory	Specified Default	Unspecified Default
name	The Raster name	true		
style	The SLD or CSS File	true		

geo-shell> **format open** --name pierce\_county --input src/test/resources/pc.tif Format pierce\_county opened!

geo-shell> **raster open** --format pierce\_county --raster pc --name pc Opened Format pierce\_county Raster pc as pc

geo-shell> style colormap --values raster --raster рс "25=#9fd182,470=#3e7f3c,920=#133912,1370=#08306b,1820=#fffff5" --file examples/style\_raster\_colormap.sld Colormap Raster Style for рс written to /home/travis/build/jericks/geoshell/examples/style\_raster\_colormap.sld!

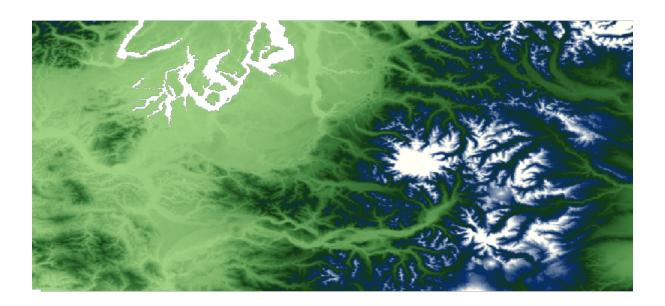

geo-shell> **raster style set** --name pc --style examples/style\_raster\_colormap.sld Style /home/travis/build/jericks/geo-shell/examples/style\_raster\_colormap.sld set on pc

geo-shell> **map open** --name map Map map opened!

geo-shell> **map add raster** --name map --raster pc Added pc layer to map map

geo-shell> **map draw** --name map --file examples/raster\_style\_set.png Done drawing /home/travis/build/jericks/geo-shell/examples/raster\_style\_set.png!

geo-shell> **map close** --name map Map map closed!

#### **Add Raster**

Add two Rasters together

Name	Description	Mandatory	Specified Default	Unspecified Default
name1	The Raster name	true		
name2	The Raster name	true		
output-format	The output Format Workspace	true		
output-name	The output Raster name	false		

### **Add Constant**

Add constant values to a Raster

Name	Description	Mandatory	Specified Default	Unspecified Default
name	The Raster name	true		
output-format	The output Format Workspace	true		
output-name	The output Raster name	false		
values	The values	true		

### **Subtract Raster**

Subtract one Raster from another

Name	Description	Mandatory	Specified Default	Unspecified Default
name1	The Raster name	true		
name2	The Raster name	true		
output-format	The output Format Workspace	true		
output-name	The output Raster name	false		

### **Subtract Constant**

Subtract constant values from a Raster

Name	Description	Mandatory	Specified Default	Unspecified Default
name	The Raster name	true		

output-format	The output Format Workspace	true		
output-name	The output Raster name	false		
values	The values	true		
from	Whether to subtract the Raster from the constant or vice verse	false	false	false

# **Multiply Raster**

Multiply two Raster together

Name	Description	Mandatory	Specified Default	Unspecified Default
name1	The Raster name	true		
name2	The Raster name	true		
output-format	The output Format Workspace	true		
output-name	The output Raster name	false		

# **Multiply Constant**

Multiply constant values to a Raster

Name	Description	Mandatory	Specified Default	Unspecified Default
name	The Raster name	true		
output-format	The output Format Workspace	true		
output-name	The output Raster name	false		
values	The values	true		

## **Divide Raster**

Divide one Raster by another Raster

Name	Description	Mandatory	Specified Default	Unspecified Default
name1	The Raster name	true		
name2	The Raster name	true		

output-format	The output Format Workspace	true	
output-name	The output Raster name	false	

### **Divide Constant**

Divide constant values against a Raster

Name	Description	Mandatory	Specified Default	Unspecified Default
name	The Raster name	true		
output-format	The output Format Workspace	true		
output-name	The output Raster name	false		
values	The values	true		

### **Contours**

Create contours.

Name	Description	Mandatory	Specified Default	Unspecified Default
name	The Raster name	true		
output-workspace	The output Layer Workspace	true		
output-name	The output Layer name	true		
band	The Raster band to contour	false	0	0
levels	The contour level or interval	true		
simplify	Whether to simplify	false	false	false
smooth	Whether to smooth	false	false	false
bounds	The Bounds	false		

## Crop

Crop a Raster.

Name	Description	Mandatory	Specified Default	Unspecified Default
name	The Raster name	true		
output-format	The output Format Workspace	true		
output-name	The output Raster name	false		
geometry	The geometry	true		

## Mosaic

Mosaic two Rasters together

Name	Description	Mandatory	Specified Default	Unspecified Default
name1	The Raster name	true		
name2	The Raster name	true		
output-format	The output Format Workspace	true		
output-name	The output Raster name	false		

## Reclassify

Reclassify a Raster.

Name	Description	Mandatory	Specified Default	Unspecified Default
name	The Raster name	true		
output-format	The output Format Workspace	true		
output-name	The output Raster name	false		
ranges	The comma delimited reclassification ranges (from- to=value)	true		
band	The Raster band to contour	false	0	0
nodata	The NODATA value	false	0	0

# Reproject

Project a Raster.

Name	Description	Mandatory	Specified Default	Unspecified Default
name	The Raster name	true		
output-format	The output Format Workspace	true		
output-name	The output Raster name	false		
projection	The projection	true		

### Scale

Scale a Raster.

Name	Description	Mandatory	Specified Default	Unspecified Default
name	The Raster name	true		
output-format	The output Format Workspace	true		
output-name	The output Raster name	false		
X	The scale factor along the x axis	true		
у	The scale factor along the y axis	true		
x-trans	The x translation	false	0	0
y-trans	The y translation	false	0	0
interpolation	The interpolation method (bicubic, bicubic2, bilinear, nearest)	false	nearest	nearest

## **Shaded Relief**

Create a shaded relief raster

Name	Description	Mandatory	Specified Default	Unspecified Default
name	The Raster name	true		
output-format	The output Format Workspace	true		

output-name	The output Raster name	false		
scale	The scale	true		
altitude	The altitude	true		
azimuth	The azimuth	true		
resx	The x resolution	false	0.5	0.5
resy	The y resolution	false	0.5	0.5
zetafactory	The zeta factory	false	1.0	1.0
algorithm	The x resolution	false	DEFAULT	DEFAULT

# Stylize

Create a new Raster by baking the style into an existing Raster

Name	Description	Mandatory	Specified Default	Unspecified Default
name	The Raster name	true		
output-format	The output Format Workspace	true		
output-name	The output Raster name	false
